SUMMARY

Full-stack engineer with production software running in three real contexts: a company chat platform used daily by an entire team, a POS and business-control system operating a textile shop in Yangon, and personal data/AI products in daily use. I own work end-to-end — requirements, architecture, build, deploy, support — and specialize in React/Next.js, React Native, typed backends, and LLM-powered workflows.

SKILLS

Frontend	React, Next.js, TypeScript, Tailwind CSS
Mobile	React Native, Expo (production apps in daily use)
Backend	Node.js, NestJS, Go, Python, REST APIs, WebSockets
Data & AI	PostgreSQL, Supabase, MongoDB, Redis, Prisma, LLM APIs, n8n

EXPERIENCE

Software Engineer — Puraido Co., Ltd.

Dec 2025 — present

Bangkok · full-time

- Core engineer on AgentHQ Chat — a 48,000-line React Native / Expo team-messaging app (realtime channels, voice notes, read receipts, shift tools) used daily across the company.
- Work across a product monorepo: Go backend services, web dashboards, and mobile — owning features from database schema to UI.

Software Engineer Intern — Puraido Co., Ltd.

Jun — Nov 2025

- Built two fully functional mobile apps that went straight to production — adopted by all employees; promoted to full-time after six months.

Freelance Full-Stack Developer

2025 — present

- LGY — full business-control system + POS for a textile wholesale shop in Yangon (Next.js, NestJS, Prisma, PostgreSQL): 26 data models, Burmese-only UI for non-technical staff, daily cash reconciliation. In production; I run support and iterate with the client.

SELECTED PROJECTS

- Football Analysis** — data pipeline (2,700+ match snapshots), Poisson + gradient-boosting fair-line models, and a three-stage LLM brief pipeline with a verifier. Python, DuckDB, scikit-learn. In daily use.
- SE-Map** (se-learn.vercel.app) — interactive map of software engineering: 157 topics, 7 step-through flows, content generated by an AI pipeline I designed. Next.js, TypeScript. Live & public.
